COMMUNITY HEALTH AIDE/PRACTITIONER
PATIENT ENCOUNTER STATISTICS

Name of Agency Reporting _____ Date _____
(reporting period)

Village Name	Patient Encounters* (1.0)	Group Ed Presentations (Number of groups) (2.0)	Patients seen for Fluoride Rinses and Gels (0.1)	Number of Visits Assisting Another Health Care Provider ** (0.25)	Miscellaneous Please Describe Service Provided
Subtotals					
Grand Total					

Fill out applicable parts of above tables monthly for each village in your area.
*Number of individual patient encounters (patient seen & SOAP note made) with CHA/P as primary health care provider.
**Number of patients seen by CHA/P along with another person who is the primary health care provider (e.g. itinerant PHN, physician, dentist, etc.)
The workload weightings vary depending on the type of visit, and are listed directly below the column title. The weightings are based on the general assumptions that a patient encounter required one hour f community health aide time, group health education presentations take two hours of time, fluoride rinses take six minutes, and assisting other providers takes about 15 minutes.
Weightings for “other” types of visits are variable.
