HIGHLY PATHOGENIC AVIAN INFLUENZA (HPAI):
UPDATE FOR ALASKA REGION

April, 2023
SPECIES AFFECTED IN ALASKA

Raptors: **Bald Eagle**, Northern Harrier, Snowy Owl

Corvids: **Common Raven**

Waders: Sandhill Crane, Great Blue Heron

Shorebirds/Passerines: Dunlin, Tree Swallow

Domestic Poultry: Chickens/ducks/emus

Mammals: Red Fox, Black Bear, Brown Bear
ADVICE TO SUBSISTENCE HUNTERS

Advice developed with tribal and State health agencies is very similar to USDA advice for hunters:

Even though HPAI is of low risk for human health, Alaska hunters should still exercise caution while hunting and eating migratory birds by following these steps to reduce infection risk:

• Do not harvest game that appear sick or are found dead.
• Wear rubber or disposable latex or nitrile gloves while handling and cleaning game.
• When done handling game, wash hands thoroughly with soap or disinfectant, and disinfect knives, equipment, and surfaces that were in contact with game.
• Do not eat, drink, or smoke while handling game.
• **Cook game and eggs thoroughly to an internal temperature of 165 degrees.**
Birds with HPAI infections may appear disoriented, be walking in circles, have jerky head movements, or hold their neck or heads in an unusual position, or may be dead. Helpful information to include when reporting: location of the bird(s), species; number of birds; and whether the birds are dead, dying, injured or behaving in an erratic or abnormal manner, or have lost their fear of humans.

To report dead or sick **wild birds:**
U.S. Fish and Wildlife Service Avian Flu Hotline
Toll free: 866-527-3358
or 907-229-6357 (thru Oct. 31, 2023)

To report dead or sick **wild mammals:** ADF&G Wildlife Veterinarian,
dfg.dwc.vet@alaska.gov

To report sick or dead **domestic birds:**
Office of the State Veterinarian
907-375-8215

**Hunter Information:**

- The Centers for Disease Control believes that the public health risk from HPAI in North America is low.
- **Alaska hunters should still exercise caution while hunting and eating migratory birds by following these steps to reduce infection risk:**
  - Do not harvest game that appear sick or are found dead.
  - Wear rubber or disposable latex or nitrile gloves while handling and cleaning game.
  - When done handling game, wash hands thoroughly with soap or disinfectant, and disinfect knives, equipment, and surfaces that were in contact with game.
  - Do not eat, drink, or smoke while handling game.
  - Cook game and eggs thoroughly to an internal temperature of 165 degrees.
